

Walnut Hill installed stone walls and a custom-designed and -crafted mahogany gate to define the space surrounding this swimming pool and spa (opposite); Crape Myrtles planted around the periphery add color and interest. Breathtaking summer sunsets warm this serene Annapolis waterfront property (top), which includes an infinity-edge pool and a promontory with seating to enjoy the view; Prokopchak was careful in his landscape design not to obstruct the dramatic water views. A picturesque custom-built arbor and gate (above) invite guests into a colorful expanse of garden and a lawn that reaches gently to the water.

LANDSCAPE ARCHITECTURE

Michael C. Prokopchak, ASLA

Walnut Hill Landscape Company

Walnut Hill Landscape Company president Michael C. Prokopchak views landscape design and construction as both an art and a science. "Every great landscape begins with a vision or idea," he says. "Just as no two people are exactly the same, we believe that no two landscapes should be identical." Walnut Hill provides one-of-a-kind, custom landscapes designed to fit the clients' individual needs and tastes, creating unique outdoor spaces that set a high standard for innovative design and quality construction.

According to Prokopchak, a strong understanding of the art and science of landscape architecture, construction and horticulture gives the Walnut Hill team a leg up in the industry—and its success proves his point: The company has received seven grand awards from the Landscape Contractors Association and recently made the *Baltimore Business Journal's* list of top 10 largest landscape firms.

Walnut Hill emphasizes a personalized approach throughout the design and installation process. "In order to make your outdoor spaces meet your needs and reflect your personal style, a spirit of cooperation, communication and competence is required," Prokopchak says. "Our landscapes will stand the test of time and provide comfortable, useable spaces for years to come."
